Classic brazing rods Cat. No. GE170B

Reference: GE170B

Price: 49,25 € Excl. Tax 59,10 € Incl. Tax

Description

Classic brazing rods with 7% phosphorus!

Brazing is traditionally done with copper- and phosphorus-based rods, available with or without silver. The brazing temperature should be between 600 and 850°C.

The more silver the rod contains, the better the wetting properties and the easier it is to apply the material.

The specific advantages of this reference GE170B include its ideal design for assembly brazing of standard clearances of between 0.05 and 0.1 mm.

Our Ref. GE170B is sold in one kilo packs. Ø 2 mm - L 500 mm.

This reference GE170B offers standard fluidity and will find its place among plumbing professionals.

Note that this product is available for sale online and can be delivered to you within 72 hours of receipt of your payment.
