Finish matt dark brown paint for weld beads Cat. No. 99615

Reference: 99615

Price: 20,75 € Excl. Tax 24,90 € Incl. Tax

Description

Guilbert Express offer a complete range of aerosol paints to give all weld beads exactly the same colour as the zinc sheets used for roofing work.

They also protect the zinc against corrosion. They are extremely easy to use. Once the bead to be covered has been degreased, simply apply the aerosol paint in the normal way, at a distance of about 15 cm.

Our aim was to identify the colours favoured by architects. These colours are now available for you to use.

All of our finishing paints are matte with a slight satin sheen.

Consumption for standard use is one bottle per square metre and per coat. It is recommended to always plan for two coats.

For a good finish, spray 20 cm from the surface to be painted.

Fast-drying paint: touch-dry in 20 minutes and fully dry in 24 hours.

The painted surface can be handled after 5 to 6 hours.

Clean using a solvent or paint stripper.

As with all Express product ranges, you can find these aerosols at your regular dealer. Do not hesitate to get in touch with your dealer for more information or order this reference on our website.

It will then be sent to you within 72 hours of receipt of your payment.
