Silver brazing stick Cat. No. GE202E

Reference: GE202E

Price: 27,65 € Excl. Tax 33,18 € Incl. Tax

Description

Brazing sticks with 2% silver!

Brazing is traditionally done with copper- and phosphorus-based rods, which are available with or without silver. The brazing temperature should be between 600 and 850°C.

The more silver the rod contains, the better the wetting properties and the easier it is to apply the material.

The specific advantages of this reference GE202E include very good corrosion resistance.

Our Cat. No. GE202E is sold in packs of 5 rods. Ø 2 mm - L 500 mm.

This reference GE202E offers good fluidity and will find its place among professionals in air conditioning, plumbing and ventilation, refrigeration, electricity and, more generally, among all those involved in fluid transport circuits.

This reference, available for sale online, can be delivered within 72 hours of receipt of your payment..
