**Reference:** 6250TL70

**Price:** 141,55 € Excl. Tax 169,86 € Incl. Tax

#### **Description**

Mini Roofer Titan'Express - Cat. No. 6250TL70

The Mini Roofer Titan'Express has been specially designed to meet the needs of waterproofing and roofing professionals who require a compact, powerful, lightweight, and reliable tool for upstand and finishing work. Equipped with a Ø50 mm titanium burner, it combines lightness and strength while ensuring rapid heat-up and excellent resistance to the most demanding working conditions.

With a power of 50 kW, the Mini Roofer Titan'Express delivers a lively, stable flame, perfectly suited for operations requiring precision and continuity. Its progressive trigger, integrated into the handle Cat. No. 620, provides optimal power control, allowing smooth transition from a gentle flame to full output. This feature makes adjustments easier and boosts productivity on site.

User comfort and safety are at the core of its design. The ergonomic, bi-material, non-slip handle remains comfortable to hold, even when wearing gloves or working in damp environments. An integrated deflector offers dual protection: shielding the hand from potential flame flashbacks and allowing the tool to be safely set down on the ground. In addition, a stable and adjustable pilot flame, reliable even in strong winds, further enhances safety and performance.

Delivered with a Cat. No. 912 quick-connect nozzle for hoses of type Cat. No. 911, the Mini Roofer Titan'Express stands out for its practicality and compatibility with essential accessories (not included here) such as a 4-bar High Pressure regulator, crimped hoses, and more. Compact, lightweight, and durable, it establishes itself as an indispensable tool for precise, safe, and efficient finishing operations.

By choosing the Mini Roofer Titan'Express, you are opting for equipment designed to the highest quality standards, ensuring both performance and long service life with every use.

This Cat. No. 6250TL70 is available for online purchase and can be delivered to your address within 72 hours after receipt of payment.
